

DANZO MLC PIPES

GAS-AIR-WATER

The Smart Choice for Water, Gas & Air Distribution

Flowing with Excellence

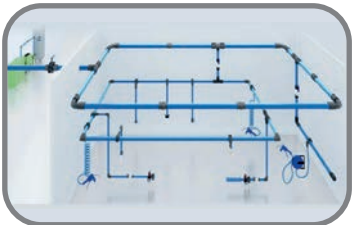

DANZO TUBES PRIVATE LIMITED

COMPOSITE PIPING SYSTEM

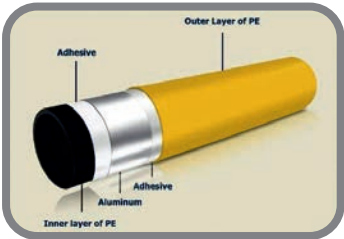

DANZO PE-AL-PE five layer composite pipe consist of an Alumunium (AL) core with inner and outer layer of Polyethylene (PE). These pipes are designed for Water, Gas & Air distribution system, offering a reliable and durable solution for transporting fluids, gas & air.

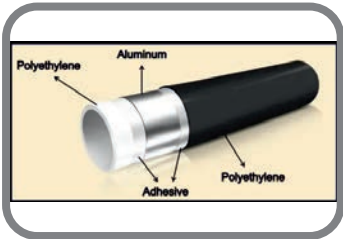

- 1. Benefits of DANZO PE-AL-PE Composite Pipes -
- 2. Corrosion Resistance
- 3. High Pressure Resistance
- 4. Temp. Resistance from -25 upto +90 deg C.
- 5. Flexibility
- 6. Low Weight
- 7. Hygiene
- 8. Smooth Surface
- 9. Long Life as compared to other options.
- 10. Less joints & Easy to work.

DANZO PE-AL-PE composite pipes offers a reliable, durable and cost effective solution for water, gas & air distribution. There unique combination of material provide excellent above benefits.

DANZO

Application of DANZO PE-AL-PE Composite Pipes -

- Cold and Hot water distribution.
- Solar Water heating system.
- Jet pump piping, submersible pump piping.
- Pneumatics / Compressed Air in industrial application.
- Medical, foodstuff and chemical industry's piping system.
- LPG and Natural Gas distribution.
- Vacuum systems.
- Radiant heating and cooling system, slab cooling.
- Cable conduits.
- Diesel, petrol and petroleum products.
- Central Air conditioning and blower.
- Insecticides spraying.
- Refrigerant systems.

DANZO

Eco Friendly Features of DANZO PE-AL-PE Composite Pipes -

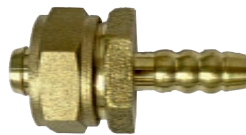

- Food Grade
- Clean and Safe
- Long Working Life
- Lead Free
- Recyclable
- Excellent Corrosion Resistance
- Permeation barrier
- Light Permeability
- Low Thermal Conductivity
- Minimum Insulation Requirement
- Manufacturing Process
- Lightweight
- Quite Flow
- Higher Flow Rates
- Nature of joints
- Minimum Leakage
- Good Flexibility
